

Education

University of Waterloo (Bachelor of Computer Science) CAV: 86.4% Sep 2023 – 2027

- Awarded 1 of 15 René Descartes National Scholarships (\$20000) from the Faculty of Mathematics
- Relevant courses: Algorithms, Data Structures and data management, Operating Systems, Application Development

Skills & Technologies

- **Languages:** Python, TypeScript, JavaScript, C++, Java, Kotlin, C, C#, HTML, CSS, Bash, SQL
- **Technologies:** AWS, Azure, Flask, Spring, Next.js, React, Angular, ASP.NET, Git, Docker, Linux

Experience

Amazon May 2025 – Aug 2025

Software Development Engineering Intern Vancouver, BC

- Developed an AI agent using AWS Strands to troubleshoot **260+ alarms** (saving over **100+ hrs / year**) by integrating CloudWatch MCP and shipment lifecycle data. **Winning project** of organization-level hackathon out of 40+ projects
- Built an automated system to orchestrate fleet-level load tests on **400+ hosts** using AWS Step Functions and Lambda, preventing **10+ SEV-2 (critical) issues / year** by adaptively adjusting the processing rate to control traffic throughput
- Implemented configurable guardrail mechanisms to prevent delays for **300k+ shipments per year** during peak-level traffic by monitoring queue metrics and dynamically scaling consumer worker threads when thresholds are breached
- Developed a user interface to enable **1000+ fulfillment centers** to onboard a shipment logistics optimization service

CAPRiser Group March 2025 – May 2025

Software Developer Intern Remote

- Implemented APIs to deliver AI sentiment analysis for trading decisions by analyzing financial news and discussions
- Developed a user interface with Next.js and React to provide real-time market data, technical indicators, and analysis
- Deployed stock/options analysis tools using Amazon EC2 and automated server management with PM2 and systemd

Amazon May 2024 – Aug 2024

Software Development Engineering Intern Vancouver, BC

- Designed an event-driven, serverless architecture (SQS, Lambda) to monitor warehouse metadata changes and automatically synchronize updates across **450+ fulfillment centers**, reducing reconciliation time to under 15 seconds
- Developed a robust configuration management application using Spring MVC, streamlining **550+ deployments / year**
- Sped up deployments by **92%** across 450+ fulfillment centers by remodelling and migrating an AppConfig application

Leadership

VMCSC Sep 2021 – Jun 2023

Co-director (23) • Senior Stream Teacher (22)

- Taught algorithms and data structures and their problem-solving applications to 80+ students through 14+ lectures
- Designed over 30 programming challenges that received over 400 submissions across 7 programming contests

MasseyHacks Sep 2022 – Jun 2023

Co-director (23)

- Directed the Technology team to develop a modern and responsive event page for 300+ visitors using HTML, CSS, JS
- Collaborated on a secure identity verification system for the communication platform used by 200+ attendees
